

AADB 134TH ANNUAL MEETING ATLANTA, GEORGIA

The Westin Peachtree Plaza | October 17-18, 2017

AADB THANKS OUR SPEAKERS

Leon A. Assael, DMD, CMM, University of Minnesota School of Dentistry

J. Craig Busey, JD, General Counsel, American Dental Association

Marlene DeFeo, RDH, MS, New York State Board of Dentistry

Grant D. Gerber, Esq., MD, Maryland Department of Health and Mental Hygiene

Daniel J. Gesek, Jr., DMD, Council on Dental Education and Licensure

Arthur C. Jee, DMD, Maryland State Board of Dental Examiners

Katherine Landsberg, Director of Government Relations, Dental Assisting
National Board; DALE Foundation

Lori Lindley, Esq., Oregon Department of Justice, General Counsel Division

Frank A. Maggio, DDS, President, DALE Foundation

James Nickman, DDS, MS, President, American Academy Pediatric Dentistry

Frank R. Recker, DDS, JD, Frank R. Recker & Associates, Co., LPA

Bruce H. Seidberg, DDS, MScD, JD

Donald R. Teater, MD, MPH, Teater Health Solutions

Tinerfe J. Tejera, DMD, MD, Southwest Florida Oral & Facial Surgery PA

Christina Thomas, MS, CAE, Executive Director, Organization for Safety,
Asepsis and Prevention (OSAP), DALE Foundation

Antwan L. Treadway, DMD, Georgia Board of Dentistry

Bobby D. White, Esq., North Carolina State Board of Dental Examiners

EDUCATIONAL SESSION LEARNING OBJECTIVES

Dental Anesthesia:

Part I Dental Anesthesia Today

Office dental anesthesia has received significant negative publicity in recent months with associated pediatric mortality and morbidity. Articles in newspapers, TV and social media question its safety. This negative view of dentists providing anesthesia has placed state dental boards in an awkward position. How do dental boards protect the public and, at same time, recognize the legitimate ability of dentist to provide anesthesia? This three-part anesthesia symposium will highlight the current state of affairs on this topic.

In part one, *Dental Anesthesia Today*, we will discuss the changing position of the American Dental Association and CDEL on dental anesthesia. We will also explore new recommendations by the American Academy Pediatric Dentistry and discuss the training of pediatric dentists in anesthesia.

Dental Anesthesia: Part II

Dental Board Updates

In part two, *Dental Board Updates*, our presenters will discuss the American Association of Oral and Maxillofacial Surgeons' (AAOMS) perspective on anesthesia, review the AAOMS team model, and survey the training of oral and maxillofacial surgeons. We will also discuss California's attempt to legislate special permits for pediatric anesthesia and Georgia's approach to permits and safety guidelines. We will conclude the session with a look at the Maryland State Board of Dental Examiners' innovative approach to "office anesthesia evaluations" and the calibration of evaluators.

Dental Anesthesia: Part III

Legal Aspects of Dental Anesthesia

Part three, *Legal Aspects of Dental Anesthesia*, will be a panel session. Our speakers will be joined by a group of attorneys who will review legal considerations related to dental anesthesia, including statutes and regulations, licensing and permits, and mandatory M&M reporting to dental boards and the AADB Clearinghouse for Board Actions. There will be ample opportunities for audience participation.

Learning Objectives: Parts I, II and III

Participants will gain knowledge of:

- The national issues of dental anesthesia mortality
- CDEL's recommendation on education recommendations for dental anesthesia
- New guidelines by American Association of Pediatric Dentists on 'pediatric' dental anesthesia
- Current models of dental anesthesia
- State issues in statutes and regulations in dental anesthesia

Opioid Use and Prescribing

This presentation is intended for dental professionals and nonprofessionals. After attending this session, you will have a better understanding of both pain and opioids and be better positioned to develop policy and continuing education programs that improve the treatment of pain while reducing the use of opioids.

Learning Objectives

Following this presentation, participants will:

- Have a better understanding of pain in the dental profession
- Understand the most efficacious treatments for both acute and chronic dental pain
- Know the complications that can occur with the use of opioids
- Be stimulated to consider guidelines and policies that will improve the treatment of pain and reduce the use of opioids

Dental Hygiene: Part I

Collaborative Practice Model - The New York State Experience

In this session, participants will learn about the Collaborative Practice Model in New York State and the state's major drivers for expanding access to care. The session will review the state board's role in enacting dental hygiene practice statutory changes and in promulgating regulatory rules to implement the law. Medicaid changes related to payment of services by collaborative practice hygienists in New York State and other issues related to collaborative practice will also be discussed.

Learning Objectives

Participants will gain knowledge of:

- The definition of Collaborative Practice
- Major drivers in New York State for expanding access to care
- Collaborative Practice model in New York State
- The Role of New York State Board for Dentistry in enacting dental hygiene practice statutory changes; and, in promulgating regulatory rules to implement the law
- Medicaid changes in New York State for payment of services by Collaborative Practice hygienists
- Issues dealing with Collaborative Practice in New York State

Dental Hygiene: Part II

Teledentistry - Applications to Access for Care

By participating in this session, participants will learn the definition of teledentistry, how technology has enhanced the practice, the models employed, and the venues that are appropriate. Our presenter will also discuss uses and limitations in dental hygiene, considerations for the future, and the potential role of AADB in teledentistry.

Learning Objectives

During the seminar, participants will learn:

- The definition of Teledentistry
- How technology has enhanced teledentistry
- Models employed
- Venues that are appropriate
- Uses and limitations in dental hygiene
- Considerations for the future
- The potential role of AADB

Specialty Recognition: The Changing Times

This session will examine the important regulatory issue of specialty recognition and certification. The speakers will review American Dental Association (ADA) specialty recognition and the approaches taken by state dental boards in recognizing and certifying dental specialists. The related issue of specialty advertising will also be discussed in substantial detail.

Learning Objectives

Attendees will gain information and insight on many aspects of this issue, including:

- The ADA's current level of specialty recognition
- The ADA approach to specialty recognition
- Specialties that may be recognized by the ADA in the future
- State dental board approaches to specialty recognition
- Regulation of specialty advertising among the states
- Recent and pending litigation regarding specialty recognition and advertising

The Future of Dental Education: Vision 2030

Sustainable, Relevant Dental Education, Practice and Licensure

This presentation will focus on the emerging changes in health care, health science education, society, and economics that will influence dental education and practice in 2030. Trends discussed will include inter-professional education and collaborative practice models. We will also consider emerging workforce models, including dental therapy, integrating oral health systems into health systems, medically necessary dental care, and value-based approaches to oral health care. This review will include value based payment, education incentives, and public expectations. The strengthening of links with other health professions will also be presented, as will the implications of these changes on licensure and continued competency.

Learning Objectives

By participating in this session, attendees will be able to:

- Describe the major trends affecting dental education and practice in the coming decade
- Understand how these trends will interact to change dental education
- Assess the impact of these changes on how the public fulfills its responsibility of oversight via initial licensure, credentialing and continued competency

Infection Control

New Resources and OSAP-DANB/DALE Foundation Collaboration Updates

In this session, you will receive an update about the OSAP-DANB/DALE Foundation Collaboration and their progress to date. We will review steps that have been taken to complete the project and future plans to aid state boards in their mission of protecting the public. This session will also provide Centers for Disease Control and Prevention (CDC) updates related to infection control, review CDC's newest 2016 publication, "Summary of Infection Prevention Practices in Dental Settings: Basic Expectations for Safe Care," and provide new guidelines for dental practices and other resources from CDC and the Organization for Safety, Asepsis and Prevention (OSAP). By participating in this session, you will also learn what some states have done recently to address infection control concerns, what infection control issues are currently under discussion around the country, and how current and future DANB and DALE Foundation activities can support the work of state boards.

Learning Objectives

By participating in this session, participants will gain:

- Knowledge about what is needed for proper infection control
- New information about infection control practices and guidelines
- Tips for networking with the necessary groups to fulfill a board's mission related to infection control
- Resources for new information about infection control
- Knowledge about where to go for government relations help
- Updates about activities impacting dentistry in other regions
